Prathamesh Asolkar

Passionate **Front-End** & **Full Stack Developer** with **2+ years of experience** creating responsive, user-friendly websites and web applications with modern and in-demand technologies.

Experience

1) SDE-1 at Prana India,
September 2025 - Present • Bengaluru (On-site)

- Co-engineered all backend services for Prana India—from auth to consultations—along with DB design using **PostgreSQL**, **Prisma**, Node/TypeScript, Docker, AWS, **Zod**, and **WebSockets**.
- Built the entire consultation FrontEnd with React-TypeScript, Zustand, Zod, TanStack Query, and WebSockets for real-time chat and call interactions.
- Built a URL shortener (FastAPI + **Jinja**) service and set up **CI/CD** pipelines using Docker, **GitHub Actions**, and AWS Amplify.

2) Software Developer Intern at Orim Advisors,
January 2025 - September 2025 • Mumbai (On-site)

- Built a scalable, high-performance FrontEnd for cloud software using **Vite**, **React/TypeScript**, **Tanstack Query**, **Zustand**, and Docker in collaboration with **Cloud** Engineers.
- Led development and maintenance of alphaco.ai, contributing to product growth and supporting its successful investment raise.
- Delivered robust testing by implementing **E2E**/component tests (**Playwright**, **Vitest**), building **FastAPI** routes and contributing to Python data-ingestion pipelines.

3) Full-Stack Developer Intern at FuzzyNodes,
December 2024 - June 2025 • Australia (Remote)

- Engineered and deployed high-performance Web2/Web3 applications (multi-restaurant platform, admin dashboard) using Next.js, Node.js/Express, TypeScript, **Bun**, and **Elysia**.
- Architected responsive, scalable UIs with Next.js, TypeScript, Tailwind CSS, and ShadCN.
- **Integrated OpenAI GPT**-4 for critical backend functions, including intelligent profanity detection and automated user blacklisting/auto-fill, optimizing **security** and interaction.

Projects

ALPHACO STOCK SCREENER [PREVIEW]:

- Building a stock screener web app using Vite, React, TypeScript, Tailwind, TanStack Query, Zustand, and Shadcn for a fast, responsive UI managing huge number of company data.
- Building REST APIs and E2E tests while contributing to a FastAPI–MongoDB backend and collaborating with UI/UX designers on Figma.
- Managing CI/CD pipelines and AWS Ubuntu EC2 deployments with Nginx for seamless frontend and backend hosting.

RESPONDLY WEB APPLICATION [PREVIEW]:

- Built a feature-rich, Google Forms–like response collection app using modern Next.js and TypeScript for a scalable, fully responsive experience.
- Implemented secure authentication with JWT and Bcryptjs, integrating MongoDB via Mongoose for robust data modeling and storage.
- Delivered visual insights using Chart.js and React Icons, and styled the UI with Ant Design and Tailwind CSS for a polished user interface.

Educational Background

Bachelors in Commerce
Bhavans College, Mumbai, MH
August 2021 - May 2024

SSC & HSC in Commerce
Valia College, Mumbai, Maharashtra

Skills

Programming Languages:

- HTML, CSS
- JavaScript + TypeScript
- Python (Beginner)

Frameworks:

- React
- NextJs
- Tailwind
- Redux & Zustand
- RTK & Tanstack Query
- React Native
- Vitest and Playwright
- Vite **PWA**s along with Service Workers.

Backend & Version Control:

- MERN Stack
- Firebase for GoogleAuth
- **Git** Version Control
- Docker
- Python FastAPI

Data:

- **MongoDB** & PostgreSQL

Tools:

- Insomnia / Postman
- Jira
- Confluence
- Slack
- Miro
- OpenAI
- AWS
