

Prathamesh Asolkar

Passionate **Front-End & Full Stack Developer** with **3+ years of experience** creating responsive, user-friendly websites and web applications with modern and in-demand technologies.

Experience

1) SDE-1 at Prana India,

September 2025 - Present • Bengaluru (On-site)

- Co-engineered all backend services for [Prana India](#)—from auth to consultations—along with DB design using **PostgreSQL**, **Prisma**, **Node/TypeScript**, **Docker**, **AWS**, **Zod**, and **WebSockets**.
- Built the entire consultation FrontEnd with **React-TypeScript**, **Zustand**, **Zod**, **TanStack Query**, and **WebSockets** for real-time chat and call interactions using **best practices**.
- Developed a full-stack [astrology consultation app](#) featuring real-time chat, in-app voice calls, push notifications, consultation workflows, and analytics dashboards.

2) Software Developer Intern at Orim Advisors,

January 2025 - September 2025 • Mumbai (On-site)

- Built a scalable, high-performance FrontEnd for cloud software using **Vite**, **React/TypeScript**, **Tanstack Query**, **Zustand**, and **Docker** in collaboration with **Cloud Engineers**.
- Led development and maintenance of [alphaco.ai](#), contributing to product growth and supporting its successful investment raise.
- Delivered robust testing by implementing **E2E**/component tests (**Playwright**, **Vitest**), building **FastAPI** routes and contributing to Python data-ingestion pipelines.

3) Full-Stack Developer Intern at FuzzyNodes,

December 2024 - June 2025 • Australia (Remote)

- Engineered and deployed high-performance [Web2](#) & [Web3](#) applications ([multi-restaurant platform](#), admin dashboard) using **Next.js**, **Node.js/Express**, **TypeScript**, **Bun**, and **Elysia**.
- Set up **CI/CD** pipelines using **Docker**, **GitHub Actions**, and **AWS Amplify** ensuring smooth and reliable deployment architecture.
- **Integrated OpenAI GPT-4** for critical backend functions, including intelligent profanity detection and automated user blacklisting/auto-fill, optimizing **security** and interaction.

Projects

SKRIBBL CLONE [[PREVIEW](#)]:

- Built a real-time multiplayer drawing and guessing game using **React**, **TypeScript**, **Node.js**, **Socket.io**, a custom **HTML5 Canvas** engine.
- Developed turn-based gameplay with **Redis**-backed room state and **BullMQ queues** for timers, word reveals, and round management across concurrent sessions.
- Implemented **JWT** auth with refresh token rotation and **Zustand** & **TanStack Query** for efficient client and server state management.

PRESSSENCE PORTFOLIO BUILDER [[PREVIEW](#)]:

- Built Presssence, a full-stack portfolio builder using **Next.js 15**, **TypeScript**, **MongoDB**, **Prisma**, and **NextAuth** with Google OAuth and credentials-based authentication.
- Developed a 5-step onboarding flow, shareable portfolios, inline edits, drag-and-drop section reordering & **Cloudinary** for media uploads.
- Implemented dynamic routing, **SEO** metadata, **Framer** animations, and **Zod** validation for a recruiter-focused user experience.

Educational Background

Bachelors in Commerce

Bhavans College, Mumbai, MH

August 2021 - May 2024

SSC & HSC in Commerce

Valia College, Mumbai, Maharashtra

Skills

Programming Languages:

- HTML, CSS
- JavaScript + TypeScript
- Python

Frameworks:

- React
- NextJs
- Tailwind
- Redux & Zustand
- RTK & Tanstack Query
- React Native
- Vitest and Playwright
- Vite **PWAs** along with Service Workers.

Backend & Version Control:

- MERN Stack
- Firebase for GoogleAuth
- **Git** Version Control
- Docker
- Python FastAPI

Data:

- **MongoDB**, **PostgreSQL**, **Redis**

Tools:

- Insomnia / Postman
- Jira
- Confluence
- Slack
- Miro
- OpenAI
- AWS
