SUMMARY

Passionate Full-Stack Developer with 2+ years of hands-on experience building responsive, user-friendly websites and web applications with modern, in-demand technologies.

EXPERIENCE

SDE-1 @ *Prana India*

Sept 2025 – Present, *Bengaluru (On-site)*

- Built the customer-facing pranaindia.com (Next.js/TypeScript) and implemented **real-time chat and voice-call** consultations end-to-end **in-house** over WebSockets, replacing paid third-party APIs and sustaining concurrent chats at low latency with **AES-GCM encrypted messaging**.
- Built the entire consultation front-end with **React, TypeScript, Zustand, Zod, TanStack Query**, and WebSockets for real-time chat and call interactions using best practices.
- Developed a full-stack astrology consultation app featuring real-time chat, in-app voice calls, push notifications, consultation workflows, and analytics dashboards.

Software Developer Intern @ *ORIM Advisors*

Jan 2025 – Sept 2025, *Mumbai (On-site)*

- Built a scalable, high-performance front-end for cloud software using **Vite, React, TypeScript, TanStack Query, Zustand, and Docker** in collaboration with Cloud Engineers.
- Led development and maintenance of **alphaco.ai**, contributing to product growth and supporting its successful investment raise.
- Delivered robust testing by implementing **E2E and component tests (Playwright, Vitest)**, building **FastAPI** routes, and contributing to Python data-ingestion pipelines.

Full Stack Developer Intern @ *Fuzzynodes*

Dec 2024 – June 2025, *Australia (Remote)*

- Engineered and deployed high-performance web applications - a **multi-restaurant platform** and admin dashboard using **Next.js, Node.js, Express, TypeScript, Bun, and Elysia** making 20+ REST API endpoints.
- Set up **CI/CD pipelines** using Docker, GitHub Actions, and AWS Amplify, ensuring a smooth and reliable deployment architecture.
- Integrated **OpenAI GPT-4** for critical backend functions including intelligent profanity detection and automated user-blacklisting auto-fill, optimizing security and interaction.

PROJECTS

Skrribbl Clone — Real-time Multiplayer Drawing Game — [Live · Code](#)

React, TypeScript, Node.js, Socket.io

Built a real-time multiplayer drawing-and-guessing game using React, TypeScript, Node.js, Socket.io, and a custom **HTML5 Canvas engine**. Developed turn-based gameplay with **Redis-backed room state** and **BullMQ queues** for timers, word reveals, and round management across concurrent sessions. Implemented **JWT auth with refresh-token rotation** and Zustand & TanStack Query for efficient client- and server-state management.

Pressence — Portfolio Builder — [Live · Code](#)

Next.js, TypeScript, MongoDB, Prisma

Built Pressence, a full-stack portfolio builder using Next.js, TypeScript, MongoDB, Prisma, and **NextAuth** with Google OAuth and credentials-based authentication. Developed a 3-step onboarding flow, shareable portfolios, inline edits, **drag-and-drop section reordering**, and Cloudinary media uploads. Implemented dynamic routing, **SEO metadata**, Framer animations, and **Zod validation** for a recruiter-focused user experience.

EDUCATION

Bhavan's College, University of Mumbai

Aug 2021 – May 2024

Bachelor of Commerce

SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React, Next.js, Tailwind, Redux, Zustand, TanStack
Backend: Node.js, Express, FastAPI, Bun, Elysia, Prisma
DevOps: Docker, AWS (EC2, S3, ECR)
Tools: Git, Insomnia, Postman, Jira, Slack, Miro, OpenAI

Databases: MongoDB, PostgreSQL, Redis
Testing: Vitest, Playwright, PWAs
Mobile: React Native, Expo, Nativewind
